Allowable Subject Matter

The following is an examiner's statement of reasons for allowance: Each independent claim iteratively determines a standard deviation for a sub-group, keeps values in the sub-group that meet a criterion, then performs an operation of regression to determine coefficients for a noise function that defines noise. Applying this combination of functions in this way to determine noise in radiography is not disclosed nor suggested by the art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
